Integrin β3 (N-terminus) monoclonal antibody

**Catalog:** MB0145  
**Host:** Mouse  
**Reactivity:** Human

### BackGround:
Integrins are heterodimers composed of noncovalently associated transmembrane α and β subunits. The 16α and 8β subunits heterodimerize to produce more than 20 different receptors. Most Integrin receptors bind ligands that are components of the extracellular matrix, including Fibronectin, Collagen and Vitronectin. Certain Integrins can also bind to soluble ligands such as Fibrinogen, or to counterreceptors on adjacent cells such as the intracellular adhesion molecules (ICAMs), leading to aggregation of cells. Ligands serve to cross-link or cluster Integrins by binding to adjacent Integrin receptors; both receptor clustering and ligand occupancy are necessary for the activation of Integrin mediated responses.

### Product:
Purified mouse monoclonal in buffer containing 0.1M Tris-Glycine (pH 7.4, 150 mM NaCl) with 0.2% sodium azide, 50%,glycerol

### Molecular Weight:
Predicted band size :87KDa  
Observed band size:110KDa

### Swiss-Prot:
P05106

### Purification&Purity:
The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:
WB: 1:1000

### Storage&Stability:
Store at 4°C short term. Aliquot and store at -20°C long term. Avoid freeze-thaw cycles.

### Specificity:
This antibody detects endogenous levels of Integrin β3 and does not cross-react with related proteins

### DATA:
Western blot detection of ITGB3 in 15ug & 25ug Leukocyte cell lysate (1:1000 diluted).

**Note:**
For research use only, not for use in diagnostic procedure.
