**Manual**

For IHC and IHC-P:
1. Into 1 ml of the Candela reaction buffer add 25 ul of the Candela DAB chromogen. Protect from the light and bring it to room temperature (about 20 minutes in advance). Mix well and use it within 4 hours.
2. When you are ready for the detection, apply the DAB mix on top of the tissue and wait for 5 minutes. The colour will develop immediately.
3. Stop the reaction by dipping the slides in the water.

For WB further dilute the chromogen: into 1 ml of Candela reaction buffer add 10 ul of the Candela DAB chromogen. Protect from the light and bring it to room temperature (about 20 minutes in advance). Mix well and use it within 4 hours.

**Precautionary Statements - EU (§28, 1272/2008)**
- P308 + P313 - IF exposed or concerned: Get medical advice/attention
- P201 - Obtain special instructions before use
- P202 - Do not handle until all safety precautions have been read and understood
- P281 - Use personal protective equipment as required
- P405 - Store locked up
- P501 - Dispose of contents/container to an approved waste disposal plant

**Safety**
- H341 - Suspected of causing genetic defects
- H350 - May cause cancer

**Applications**
- IHC, IHC-P, WB

**Storage**
- Store at 2-8°C.

**Expiry Date**
- 12 months after purchase

**Limitation**
- For research use only.
