

Flow Cytometry Tube 5 ml (1000 pcs. , sterile)

Order No.:05-03040-01

Description

5 ml round-bottom tubes are suitable for a wide range of laboratory applications such as sample preparation or sample storage. The tubes are ideal for flow cytometry. The bundle of pluriStrainer Mini and flow cytometry tubes can be used for sample preparation and as replacement for Falcon® round-bottom tubes with blue cell strainer cap (35 µm nylon mesh). Use the pluriStrainer Mini prior fluorescence-activated cell sorting (FACS) to get a single cell suspension and avoid clogging the flow cell.

Application

- Sample preparation, storage and centrifugation
- Cell isolation and enrichment
- Cell staining for flow cytometry analysis

Additional Information

Size	1000 pcs.
Area of interest	Cell Biology
Storage Condition	Room Temperature
Shipping Condition	Room Temperature
Regulatory Statement	For research use only. Not for use in diagnostic procedures

Packaging

25 pcs. / bag

Warning and Limitations

This product is for research and development only, not for diagnostic or therapeutic use.
