

BioMag Multi-32 Microcentrifuge Tube Separator

Description

The BioMag Multi-32 holds thirty-two microcentrifuge tubes for molecular biology and other applications. Sixteen tubes may be magnetically separated at one time.

Use

Magnetic separations can be performed on up to sixteen microcentrifuge tubes by simply placing the tubes in the inner row of the separator. Sixteen tubes may also be held in the outer rows of the separator for mixing and short incubations. Holds 1.0ml and 1.5ml microcentrifuge tubes. The BioMag solution will move toward the side of the separator in less than 5 minutes to complete the separation. Pellets will form on the side of the test tube. Once separation is complete aspirate the supernatant with the BioMag Separator in place. Be careful not to disturb the separated BioMag.

Care

The BioMag Multi-32 unit should be wiped clean with mild detergent.

DO NOT IMMERSE. Harsh chemicals and organic solvents may cause damage to the surface of the unit.

Warning

Strong Magnetic Field. This separation unit should be used and stored at a safe distance from magnetic media such as computers, videotapes and credit cards etc.
