17-DMAG Inhibitor
Catalog# SIH-114A
Size: 1mg

Product 17-DMAG
17-Dimethylaminoethylamino-17-demethoxygeldanamycin

Formula C_{32}H_{48}N_{4}O_{8}

MW 616.8

Source/Host Synthetic

Purity 98% (TLC: 10% Methanol/methylene chloride; Rf=0.49)

Solubility Soluble in DMSO (>25mg/mL and ethanol (10mg/mL)

Appearance Purple solid

Storage and stability -20°C; 1 year+; shipped ambient Protect from light.

Scientific Background

17-DMAG is a water soluble & cell-permeable analog of Geldanamycin and 17-AAG (1). It binds to the APTase site of human Hsp90a with high affinity, has cytotoxic activity against many cancer cell lines (2), and acts as angiogenesis inhibitor (3).

This Hsp90 inhibitor shows promise in preclinical models. 17-DMAG has excellent bioavailability, is widely distributed to tissues, and is quantitatively metabolized much less than is 17-AAG.

Material Safety Data Sheet

This product is for \textit{in vitro} research use only and is not intended for use in humans or animals

The below information is believed to be correct but does not purport to be all inclusive and shall not be held liable for any damage resulting from handling or from contact with the above product. See the Technical Specification, Packing Slip, Invoice, and Product Catalogue for additional terms and conditions of sale.

**Hazardous Ingredients**

The physical, chemical and toxicological properties of these components have not been fully investigated. It is recommended that all laboratory personnel follow standard laboratory safety procedures when handling this product. Safety procedures should include wearing OSHA approved safety glasses, gloves and protective clothing. Direct physical contact with this product should be avoided.

**Physical Data**

This product consists of powder shipped at ambient temperatures. The physical properties of this product have not been investigated thoroughly. CAS number 30562-34-6, Chemical Class: Ansamycin antibiotic derivative

**Fire and Explosion Hazard and Reactivity Data**

NOT APPLICABLE

**Toxicological Properties**

May be harmful by inhalation, ingestion, or skin absorption. The toxicological properties of this product have not been investigated thoroughly. Exercise due caution.

**Preventative Measures**

Wear chemical safety goggles and compatible chemical-resistant gloves. Avoid inhalation, contact with eyes, skin or clothing.

**Spill and Leak Procedures**

Observe all federal, state and local environmental regulations.

- Wear protective equipment.
- Absorb on sand or vermiculite and place in closed containers for disposal.
- Dispose or mix the material with a combustible solvent and burn in a chemical incinerator equipped with an afterburner and scrubber.

**First Aid Measures**

- If swallowed, wash out mouth with water, provided person is conscious. Call a physician.
- In case of skin contact, flush with copious amounts of water for at least 15 minutes. Remove contaminated clothing and shoes. If a rash or other irritation develops, call a physician.
- If inhaled, remove to fresh air. If breathing becomes difficult, call a physician.
- In case of eye contact, flush with copious amounts of water for at least 15 minutes while separating the eyelids with fingers. Call a physician.
